

# Country Lane Estates Water Conservation

Water conservation is an important aspect for any community. On July 18, 2017 Country Lane Estates Board of Directors made a decision to institute a water conservation program that parallels our local communities

## Water Conservation Levels

**Updated 07/20/17: currently at Water Conservation Level 2. See below for more information.**

The following chart represents the different levels of water conservation and watering. How Country Lane determines the level of water conservation is based on the Town of High River Water Conservation Bylaw and several factors including the condition of the aquifers and wells used by High River, ensuring that there are sufficient water reserves available in case of fires, environmental sustainability and resource protection, water quality standards, and infrastructure limitations.

### Watering Days

Once Country Lane reaches **Water Conservation Level 2 or 3**, watering is only permitted between 7-10 am and 7-10 pm on specific days for each Lot. Please use water wisely by only watering in half hour to hour long increments. Refer to the chart below to determine your days:
